

Policies

Interlibrary Loan (ILL)

Interlibrary Loan is permitted for print format (but not digital). Single copies of individual articles may be reproduced for distribution without charge to individual libraries of not-for-profit, non-commercial organizations in accordance with fair usage guidelines.

Use of Licensed Material

Academic institutions: Teaching staff may reproduce individual articles from licensed material for distribution to students accredited to the Licensee.

Corporate and government institutions: Authorized users may print and/or download individual articles and other individual items from searches of the licensed content for research and regulatory purposes in the furtherance of the Licensee's business.

Post Cancellation

ASME's post-cancellation policy applies to all purchased content and ensures institutional customers retain access to all licensed material upon cancellation of the license agreement. It is applicable to all institutional customers with a signed license agreement. This does not include any additional content to which your institution was granted access.

Access is subject to payment of an annual access fee, which supports the cost of hosting content and related customer service. Access fees do not apply to customers with a current license to the relevant publications.
